

Lab 4 – Vibe Coding

Prompts Used – Fruit Ninja

Task 1 – Fix Collision Detection

I am working on a Python Pygame Fruit Ninja game for a Vibe Coding lab.

Fast mouse swipes sometimes pass through a fruit without slicing it even though the blade visually

Modify the game to use a line-segment collision check between the previous and current mouse posi

Task 2 – Game Over Screen

Add a Game Over screen that displays the final score when a bomb is sliced or the player runs out

Task 3 – Replay and Difficulty Options

After Game Over, display options for Easy, Medium, Hard, and Exit.

Allow the player to select a difficulty using the keyboard:

- E for Easy
- M for Medium
- H for Hard
- Escape to Exit

Restart the game with the selected difficulty and apply different spawn rates, speeds, and bomb c

Task 4 – Sound Feedback

Add sound feedback for slicing a fruit, hitting a bomb, and Game Over.

Use generated tones or local/free sounds so the project does not depend on external downloads. En
